FOOD

- Sampling is allowed provided the following conditions are met:

Handwashing- Each vendor who prepares samples at the sales location must have a portable hand washing station at the sample preparation site. Minimum requirements would include a container of water which contains an adequate supply of water that flows freely from a tap or spigot. The spigot must be a type which will stay in an open position without being held, so that both hands can be washed at once. The facilities also must include a catch bucket for the water, soap, and single service towels. Hands must be washed whenever the sampler uses the restroom, any time the hands become soiled, or upon return to the work station after leaving for any reason. Hands must be washed at the sampling station in addition to using the hand wash facilities in the toilet. This double washing requirement is consistent with hand wash requirements in all other food establishments. Hand sanitizers and moist towelettes may be used, but are not permitted as a substitute for these hand washing requirements.

Sample Protection- Unwrapped samples must be covered when they are not actively sampled by customers. Samples of potentially hazardous foods that are prepared in advance must be kept refrigerated (40 degrees F) while in storage. Potentially hazardous food samples must be discarded after two hours out of refrigeration. Samples should be set-up to avoid cross contamination by customers. Tableware used by customers for sampling product must be single service. Individual sample cups, toothpicks, or disposable utensils are encouraged. Tongs or other utensils should be provided.

Vendors providing samples must have a container for trash disposal clearly visible and accessible for customers to use.

- No cooking will be allowed on-site without prior Market approval. A fire extinguisher must accompany your outdoor cooking set up.
- All food products must be sold, displayed and stored from an elevated surface (not on the ground). All vendors must utilize tables, shelves, cases or other structures for these purposes.
- Agricultural items must be grown by a member of the Market.

ANIMALS

- Vendors may not bring live animals to sell at the Market, but can advertise animals for sale at their farms, ie: chicks, ducklings, or others as allowed and within the laws permitted by Oregon Department of Agriculture.

What is an Oregon Trail Card?

An Oregon Trail Card is an Electronic Benefits Transfer (EBT) card and is similar to a debit card from a bank. It is what the Department of Human Services (DHS) uses to get benefits to clients.

When individuals or families qualify for food or cash benefits, Oregon Trail accounts are set up for them. Benefits are deposited into the accounts each month. The Oregon Trail Card, along with a private, Personal Identification Number (PIN), is used to access benefits.

Oregon Trail Cards are used mostly for food benefits from the Supplemental Nutrition Assistance Program (SNAP).

With SNAP food benefits you can:

Buy food. SNAP benefits can be used only to purchase food. SNAP benefits cannot be used to buy non-food items such as alcoholic beverages, cigarettes, vitamins or medicines, pet foods or household products. To learn about the types of food items you can buy with SNAP benefits, see the Eligible Food Items page.

Households can use SNAP benefits to buy foods for the household to eat, such as:

bread and cereals; fruits and vegetables; meats, fish and poultry; and dairy products.
